

August 2, 2008

We came to visit College Station for a weekend to look for a house three months before we had to move from California. Michael was able to meet with us that day to show us a house that was at the sheetrock stage. He also took us to a couple other homes to show us his completed product. We were very impressed by his style and quality of craftsmanship. Michael agreed to finish the house earlier than he had initially planned so that we could move in before starting our new jobs.

Even though we were in California during the completion of the house, Michael frequently communicated with us by phone and email to make decisions on filling out the details of the house and occasionally sent us photo updates on the progress. He was very pleasant to work with and responded quickly to our questions and requests.

We love our house and receive numerous compliments from guests. We highly recommend Michael Schaefer, whether you are moving within College Station or from out of state!
