Dear Michael,

We just wanted to let you know how much we are enjoying our new home and thank you for such a pleasurable building experience. As with most parents of young children, we wanted our future home to not only fit our present needs, but to grow with us for many years to come. After an exhausting search of existing houses and plans, we knew our only real solution would be to embark on a custom home.

Many of the architectural details and unique qualities we desired in our future home were hard to put into words. Fortunately, we visited one of your existing homes and were finally able to see those details in person. After meeting with you and visiting additional *Schaefer Custom Homes*, our decision to partner with you with for the building process was an easy one. Your assistance in fine-tuning our plan and helping us select a lot that would fit both our future home and family lifestyle was greatly appreciated.

We frequently asked for and received your honest and candid observations as we finalized important decisions. Once underway, your near daily contact kept us well-informed on the construction progress and gave us the ability to "customize" areas along the way to ensure our home exceeded our high expectations. Being accessible and patient with our many questions made this process enjoyable and rewarding.

We were confident in the product we were receiving because of your attention to detail. The sub-contractors who worked on our home were all very courteous, helpful and accommodating. It was evident that your positive relationships with each of them enabled our home construction to completed ahead of the contract completion date.

In short, we are extremely pleased with our new home. It is hard to believe we moved in less than three months ago. In many ways, it feels like our house has been "home" forever. We feel sure that can only be attributed to the fact that it has fit our family perfectly since the day we moved in.

With thanks and appreciation,

Mike and Bethany Wright
