Dear Michael:

We would like you to know how excited we are to soon be living in our new home that you built for us. We wanted our new home to have an open and inviting feeling and you have accomplished that need with your custom plans.

For several months last year, we repeatedly drove through Indian Lakes in search of a new place to call home. On each visit, we saw new homes being built by the different custom home builders. But no matter how many homes we looked at, the ones built by *Schaefer Custom Homes* seemed the right fit for us. We liked the style, quality of the materials, and the quality of the workmanship very much.

During our initial visit with you, we knew we wanted you to build our new home. We found you to be open, knowledgeable, and friendly. You spent time with us describing your approach to building a home to fit each family's needs.

The building process for our home has been a wonderful experience. Even though we currently live near the Houston area and have not been able to visit the construction site as often as we would like, you have done a great job on keeping us informed on the progress of the house. Your attention to detail, willingness to listen, and offering suggestions on choices and options has been greatly appreciated. Also, you have always been accessible and patient when we asked you our many questions. It has been a pleasure working with you.

In the next few weeks, we will be moving into our new home. It is a home we are proud to have been built by *Schaefer Custom Homes*. Thank you so much for making our dream become a reality.

Sincerely,

*Robert and Linda Mullins*
